What Job Does It Do?

****Name:** Matthew Grossman**

****Date:** 9/7/26**

****AI tool used:** None**

****Conversation link(s):** None- thought out organically.**

****Time spent:** 90 minutes**

1. What I did

- I picked a product I use on a daily basis: the CRM GoHighLevel
- What does GHL do for me: It allows me to see all leads generated from each client I work for.
- It allows me to contact those leads; by email, phone, sms, or whatsapp.
- It allows me to book appointments with those leads all while linking to my google calendar.
- The last time I used it was today to call a lead.
- Without it, I would not be able to perform my job independently, as I would have to rely on others to make my schedule.

2. Artifact

Description: Go

GoHighLevel, my crm, allows me to see all leads generated from each client I work for.

- It allows me to contact those leads; by email, phone, sms, or whatsapp.
- It allows me to book appointments with those leads all while linking to my google calendar.
- The last time I used it was today to call a lead.
- Without it, I would not be able to perform my job independently, as I would have to rely on others to make my schedule.

Three questions

1. Does your platform allow you to reach out to leads through an api key?
2. Can your platform link directly to your personal calendar?
3. Does your platform use AI to make menial tasks easier?

3. Claim
